Región Metropolitana, Chile.

RESUME

I'm a developer and gamer, from Venezuela. Now Living in Santiago, Chile. With experience in front-end and a little in back-end. I am interested in learning new technologies, always trying to follow the best practices of each new language and framework. I enjoy front-end development, and work for good details and a good user experience.

WORK EXPERIENCE

JUNIOR DEVELOPER

PAYKU | September 2020 – Currently

I've been working creating some modules for sign up and subscriptions using React and as full-stack using PHP for maintaining and creating new features to Payku platform.

BENCHMARKING DEVELOPER

GEPRO | January 2020 – April 2020

Full-stack development of a platform of benchmarking using React, Redux as tools and Material UI, such as back-end development through Node, Express and sequelize.

MAINTENANCE ENGINEER

PONTIFICIA U. CATOLICA DE CHILE | 2018 -2020

Development applications to improve the control and order of the laboratory equipment and coordination of maintenance plans for the equipment found in the teaching laboratories of the Faculty of Physics.
